

SEWER CAPACITY AND REASSURANCE PROGRAM
(SCARP)
INFLOW REMOVAL PROGRAM

BUILDING INSPECTIONS

WHAT IS THE PURPOSE OF BUILDING INSPECTIONS?

The sole purpose of the inspections is to identify and eliminate sources of sewer system inflow since these sources can cause sewer backups and/or overflows which harm the environment.

WHAT IS INCLUDED IN BUILDING INSPECTIONS?

Borough personnel will inspect the exterior of the house and the basement to determine if sources of inflow exist on the property.

HOW WILL BUILDING INSPECTIONS BE SCHEDULED?

Notices will be distributed in the areas where inspections will be conducted after which Borough personnel will go door-to-door to conduct the inspections. In those instances where property owners are not home or where the property owners would like to schedule a more convenient time for the inspection, the inspection will be scheduled at a later date.

WHERE WILL THE INSPECTIONS BE CONDUCTED?

-In those neighborhoods or areas of the sewer system where other investigations or analysis of the sewer flow data suggests that inflow sources may exist on private property or in the houses in that area.

Contact Chris L. Boehm, Borough Manager at 610-966-2503 or via e-mail at clboehm@macungie.pa.us with any questions.
